Gasboy® PLUS Series Fleet Management Systems

The Gasboy PLUS series is a new generation of fleet management systems for today's operators. They're the heart of your turnkey Gasboy fleet solution, with choices to get what you need today and build your system as your operation grows. Gasboy and technology partner Orpak®

bring you world class performance in the PLUS series fleet management systems. All Gasboy products are supported by the world's largest network of fleet product distributors and authorized service contractors. Superior technology and proven solutions add up to a better tomorrow.

Complete solutions from a single supplier.

You don't have to construct your own system from different suppliers and take chances on compatibility and responsibility. Success is simple with turnkey solutions from Gasboy, a trusted supplier to fleet operators for more than 80 years.

Fleet Head Office is Gasboy's web-based, enterprise-wide software that consolidates data from multiple sites and generates superior management reports.

- > Manage your operation from anywhere: the office, home or on the road.
- > Customizable reports are easy to configure to your specific needs.
- > Schedule proactive vehicle maintenance based on accurate and timely information.
- > Set restrictions for specific vehicles or drivers per day/week/month, geographic location, fuel type and more

CFN™ PLUS is Gasboy's new generation web-based site controller. It's the heart of your total, turnkey Gasboy solution for fleet and commercial (non-payment) applications.

- > Interfaces seamlessly to Fleet Head Office, Gasboy Atlas® dispensers, ICR PLUS, FuelPoint® PLUS and more
- > Hardened for the tough outdoor or indoor environment of fleet operations

ICR PLUS is Gasboy's island card reader for use with CFN PLUS. It supports multiple access technologies, including web-based and contactless systems.

- > Lighted terminals available 24/7/365 for unattended sites
- > Cost-effective way to offer functionality at multiple fuels islands at the same location

Islander™ PLUS combines the functionality of CFN PLUS and ICR PLUS in a single package hardened for the fuel island.

- > Cost-effective way to offer functionality at sites with a single fuel island
- > Lighted terminals available 24/7/365 for unattended sites
- > Supports multiple access technologies, including web-based and contactless systems

FuelPoint® PLUS is the industry's only truly wireless vehicle identification system. Gasboy's highly secure, hands free, wireless

vehicle identification, authorization and control system uses radio frequency identification.

- > Tamper resistant components assure nozzle is inserted into an authorized vehicle before fueling
- > Vehicle module provides accurate odometer readings and other information directly from the vehicle bus, eliminating human error
- > Eliminates the need for keys, cards, or vouchers that can get lost or be misused

Fuel Truck Controller is a mobile fueling system that brings fleet fueling to heavy or

stationary equipment from a tanker truck. It's fully compatible with the other Gasboy PLUS series so that transaction information stored on the Fuel Truck Controller uploads into the Fleet Head Office when the tanker truck returns to the fuel island.

- > Extends your fleet management system to stationary equipment
- > Adds mobility to your system
- > Fully compatible with site controller and fuel island parts of the system

Worldwide leader in solutions for fleet and commercial markets.
